

FINANCE | HEALTHCARE | INSURANCE | NON-PROFIT | REAL ESTATE | RETAIL

SGP works in collaboration with our clients to stimulate and strengthen operating processes. Our results-driven approach improves productivity, unlocks innovation and drives corporate performance through information technology. We work alongside globally recognized core software products for seamless integration.

Driven Approach

SGP is vertically aligned in several key sectors – extensively in finance and real estate – and has leveraged that domain knowledge for over 25 years. In all areas, SGP can transform your business practices and create seamless and efficient solutions. We value ease of use, audit controls and reporting tools.

We work with corporate-level and IT staff to design and deploy databases with global user interfaces. We standardize and automate daily and month-end work activities. Our products increase productivity, reduce operational risk and further reveal new sources of revenue for stakeholders.

Industry Solutions

Experience shows that firms are faced with the challenge of using big data engines that prove inflexible and cumbersome. SGP targets these inefficiencies by establishing the structure, processes and tools for improvement. We align technical objectives with your internal policies, adapt to emerging technologies and capitalize on existing application portfolios.

We engineer strategic solutions that are key enablers of success in the digital workplace. By creating metrics, we ensure timely completion of your tactical goals that will propel your organization forward.

Proven Results

SGP provides constructive guidance and expertise to satisfy your initiatives at any stage. In partnership with your team, we draft business requirements and develop a cohesive project plan that considers your technology, staff makeup and deployment protocols.

Equipped with a proven track record for positive end-to-end customer experience, we offer a suite of services from consulting and application delivery to long-term support and onsite training. Our experts impart an informed and creative perspective to aid companies in realizing the full potential of their resources, assets and investments.

- System consolidation
- Workflow analysis

Client Success Story

The Client:

A German bank with a multi-billion dollar pool of international commercial real estate loans and equity participations.

REDS Collaboration: REDS oversees the running of real estate loan portfolios. Deals are tracked from approval through expiration. Data is maintained via user input and automated feeds from the mainframe. The version-based operating memorandums, escrow administrator, tickler and document compliance module and on-demand reporting allow for oversight and control.
